At the request of instructors of organic chemistry, we have increased the number of references to current literature. It is for a long time recognized that activation with aluminum hydride is one of the most effective method for producing primary or secondary alcohols or phenols by using simple α,β -unsaturated esters such as acetylacetoacetic acid. The advantages of this method include a selective deacetylation without α -hydroxylation; use of more primary or secondary alcohols as starting materials; and synthesis of ethyl α -keto- This comprehensive laboratory text provides a thorough introduction to all of the significant operations used in the organic lab and includes a large selection of traditional-scale experiments and minilabs. Click Here to Get Amazon Books and Audiobooks Operational Organic Chemistry, Fourth Edition is written for the student and for the practicing organic chemist who desires a thorough grounding in the fundamental experimental methods in organic chemistry, especially those which are routinely employed but rarely discussed in introductory texts. The fourth edition of this highly successful text not only shows you how to carry out these operations, but also helps you solve some of the significant problems encountered during their performance. Read: >>> Easiest Universities to Get Into in USA The Fourth Edition contains a new introductory section, "Chemistry and the Environment," which includes a discussion of the principles of green chemistry. Several green experiments have been added, and some experiments from the previous editions have been revised to make them greener. This course is an introduction to most of the significant operations used in the organic laboratory. It includes a large selection of traditional-scale experiments, which are followed by mini-labs. All operations are presented in standard format and reference procedures are given for each experiment. The solutions to all the problems appearing in this book have been published in their entirety; they do not appear in an answer booklet. Operational Organic Chemistry - John W.
